

Strategic Introduction to Australasian TPM & Lean

ACCREDITED **YELLOW BELT** ONLINE SELF-PACED TRAINING COURSE

This online self-paced training course is based on, and enhanced through, over 25+ years experience in assisting over 150 Australasian companies on their improvement journey to TPM & Operational Excellence

CTPM's belt based training pathway is aligned with our Australasian TPM & Lean methodology for operational improvement

Do your people get frustrated because the equipment & processes don't work perfectly all the time?

If you answer 'YES' then this training is for you!

CTPM

your TPM & Operational Excellence Partner

WHAT IS AUSTRALASIAN TPM & LEAN ALL ABOUT?

Australasian TPM & Lean is focused on progressively **engaging and motivating all your people** to identify and rectify losses and wastes at the earliest possible time.

Its aim is to develop your people as you improve safety, quality, delivery, plant & equipment, supplier, inventory performance and most importantly morale, so as to significantly improve bottom-line results.

It recognises and applies:

The 3 critical parts of a Continuous Improvement Strategy to achieve TPM & Operational Excellence

DURING THIS TRAINING YOU WILL LEARN ABOUT:

- The evolution and first principles of Lean and Total Productive Maintenance (TPM);
- The essential foundations of performance measures, ownership and engagement through on-going improvement to ensure sustainability;
- The role of Improvement Drivers rather than just using performance measures to prioritise actions;
- Why having the right organisation structure and roster alignment is critical; and
- Why an improvement framework that recognises the need for an organic approach rather than only a project focused approach is required to achieve TPM & Operational Excellence.

KEY TAKE-A-WAYS WILL BE:

- How to free up everyone's time so that you can take a structured, disciplined yet flexible organic approach to improvement activities;
- How to sequence and integrate the 3 critical parts of your Continuous Improvement Strategy to achieve TPM & Operational Excellence;
- How to significantly increase the capacity and reliability of your plant & equipment while minimising your maintenance spend;
- How to use effective Daily Management to develop your Frontline Leaders so everyone else in the Leadership chain is NOT working down a level;
- How to ensure all teams are successful and hence promote further improvement; and
- How to get some quick wins while setting the scene for long term success.

THE COURSE CONSISTS OF 4 PARTS

ONLINE TRAINING LEADER

Ross Kennedy, founded CTPM in 1996 after more than 20 years of manufacturing and operational experience covering maintenance, production, operations and executive roles along with 5 years of international consulting experience.

Ross has been actively involved with Lean since 1985 and the application of TPM since 1990. In 1998 he initially developed CTPM's Australasian TPM methodology, and in 2007 he launched CTPM's Australasian TPM & Lean methodology.

Recognised as Australasia's leading authority on TPM and Lean, Ross has assisted sites throughout Australia, New Zealand, Indonesia, Thailand and China to strive for and achieve TPM & Operational Excellence.

His latest achievement is becoming an internationally acclaimed author with the publication of his first two books by Productivity Press in USA / UK.

1st Book - Aug 2017

"Understanding, Measuring and Improving Overall Equipment Effectiveness: How to Use OEE to Drive Significant Process Improvement"

ORDER HERE

2nd Book - Dec 2018

"Understanding, Measuring and Improving Daily Management: How to use effective Daily Management to drive significant Process Improvement"

ORDER HERE

This online self-paced training will take the mystery out of integrating all the principles, methods, tools and activities of TPM & Lean

HOW DOES IT WORK?

Each part consists of a series of pre-recorded sessions which can be viewed at your convenience, along with an assessment sheet consisting of multiple-choice questions to confirm your learning.

You will be provided with a full set of the slides as well as at least one relevant reference paper or booklet and a site self-rating sheet for each part of the course to support your learning.

Access to each part of the course will be via a shared Dropbox folder, where you will be able to view the pre-recorded sessions along with any support videos, and download the slides and reference documents.

Once each part has been completed, you will be required to complete the multiple-choice assessment sheet relating to the pre-recorded sessions. If a >80% score is achieved, then the next Part of the course will be made available. At the successful completion of all 4 parts, you will be issued with a CTPM Australasian TPM & Lean Yellow Belt Certificate of Attainment.

SUPPORT

You will receive unlimited support from our admin team during business hours (Monday to Friday) via phone or email, and your training leader will host weekly live webinars to allow you to interact with fellow students, discuss any questions or issues, and reflect on your site's completed self-rating sheet.

COURSE FEES

Online Training	CTPM Site Member	Non Member
